Mover Kit

TWSU 0152

Get kids moving, building and coding with this toy that reacts to movement with light and can be coded in infinite ways! Ages: 8+

BUILD IT YOURSELF

We believe children should use technology to create, not consume. Learn how the Mover Kit works by building it yourself. It's as simple as making a LEGO house or paper airplanes, but waaaay cooler!

MOVE TO BRING IT TO LIFE

The Mover Kit reacts to your movement in any way you program it to. Run, jump, dance, spin, use it as a lightsaber, a wizard's wand, a police car light – anything!

INVENT YOUR OWN APPS

You can transform your Mover Kit in infinite ways! Learn to code it using our simple visual coding interface. When you're done, share it with the entire community so they can enjoy your invention!
